

A satellite with solar panels is shown in orbit above the Earth's surface. The Earth's curvature and a bright light source are visible in the background.

APLICACION DE LA GEOMORFOLOGIA

YERAL FERAMIR SANTOS FABIAN 100758838

APLICACIONES

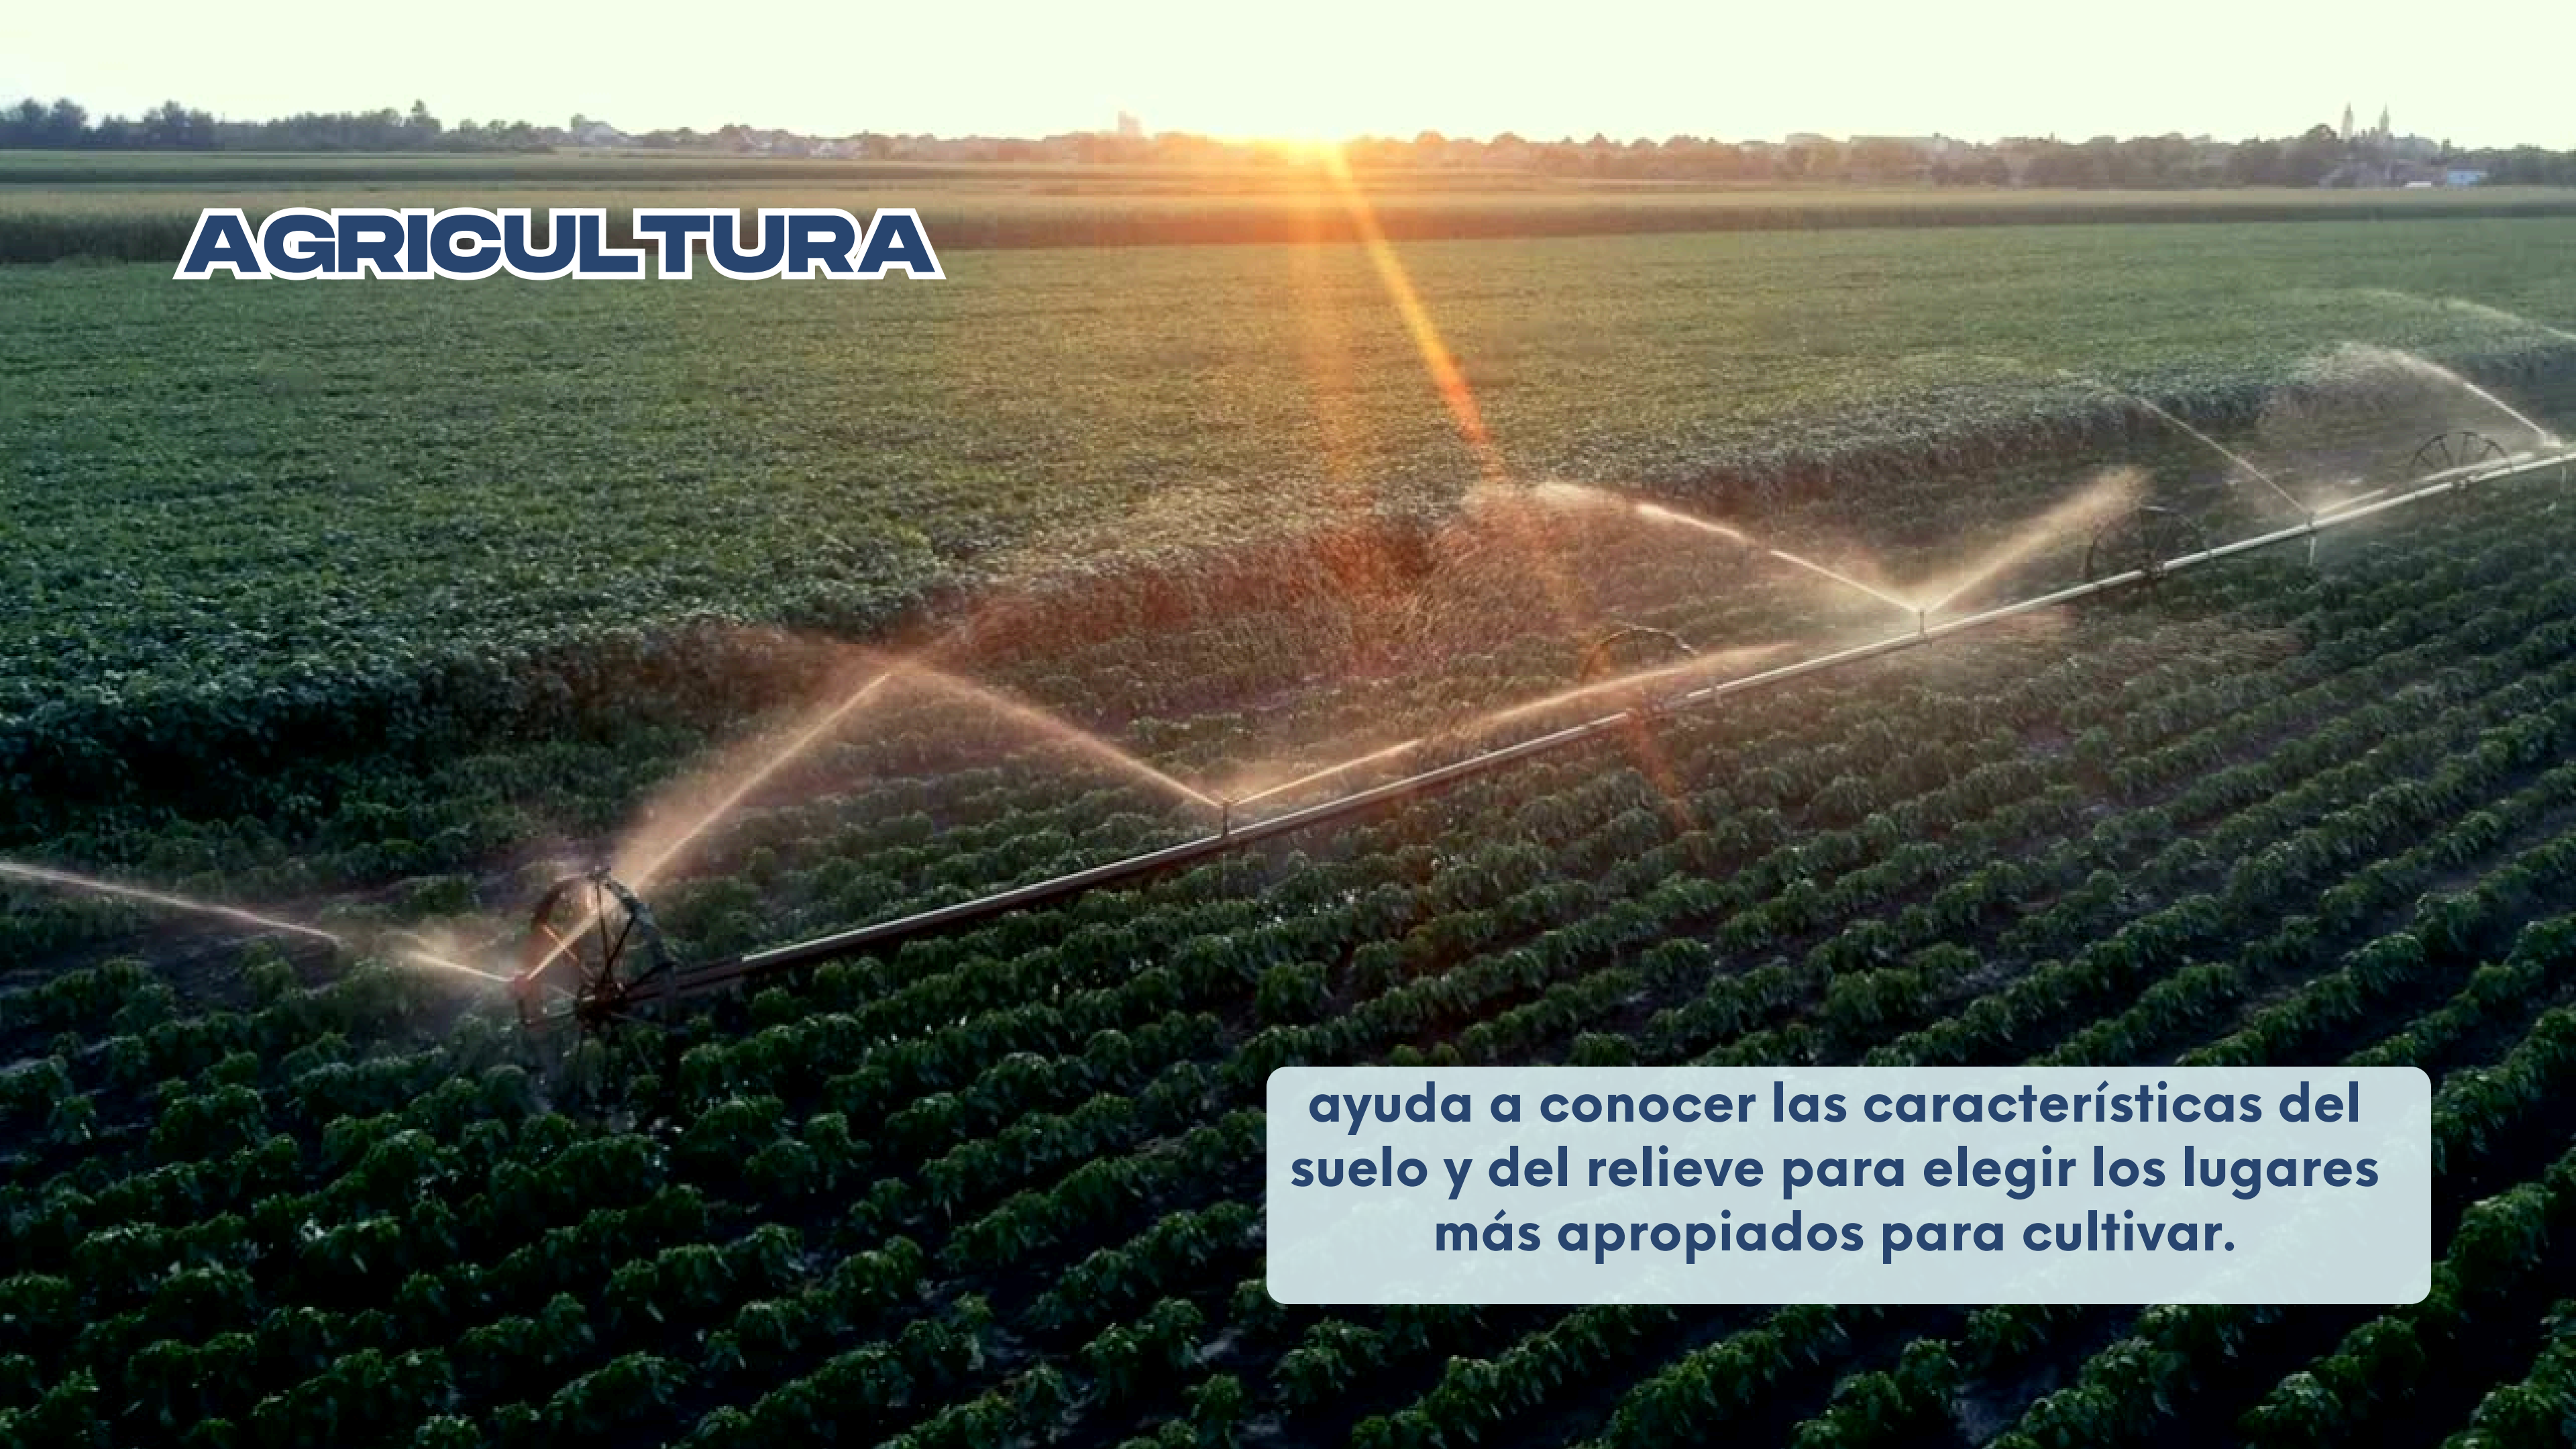

A futuristic scene with several people standing in a dark space. The floor is a grid of glowing blue and green squares. Several bright blue light beams emanate from the ceiling, creating a high-tech atmosphere. The word 'APLICACIONES' is overlaid in large, bold, white letters with a blue outline.

CONSTRUCCION

An aerial photograph of a city, likely Quito, Ecuador, showing a river (Cajamarcas River) in the foreground. A modern bridge with a distinctive green, diamond-patterned, curved roof spans the river. The bridge's design is reminiscent of a bird or a wing. In the background, a dense urban area with various buildings and a hillside with more structures are visible. The word "CONSTRUCCION" is overlaid in large, bold, blue letters with a white outline in the upper left quadrant.

**se utiliza para estudiar el terreno
antes de construir puentes, presas,
carreteras y túneles.**

AGRICULTURA

An aerial photograph of a center pivot irrigation system in operation over a large agricultural field. The sun is low on the horizon, creating a warm, golden glow and long shadows. The irrigation system consists of a long, straight metal pipe with several wheels, from which multiple smaller pipes branch out, each ending in a sprinkler head that is spraying water. The field is covered in rows of green crops, likely corn. In the background, a line of trees and a small town with a church steeple are visible under the sunset sky.

ayuda a conocer las características del suelo y del relieve para elegir los lugares más apropiados para cultivar.

ESTUDIOS COSTEROS

An aerial photograph of a rugged coastline. The land on the left is covered in green vegetation and has a few small buildings with red roofs. A narrow, rocky beach is visible where the land meets the sea. The ocean is a deep blue-green, with white foam from waves crashing against dark, jagged rocks. In the foreground, there's a large, dark, hexagonal rock formation. The overall scene depicts a natural coastal environment.

ayuda a comprender la erosión
de las playas y los cambios en las
costas.

PREVENCION DE RIESGOS NATURALES

permitirá identificar áreas vulnerables a inundaciones, deslizamientos y erosión.

ORDENAMIENTO TERRITORIAL

proporciona información para
organizar adecuadamente el uso de
diferentes áreas de un territorio.

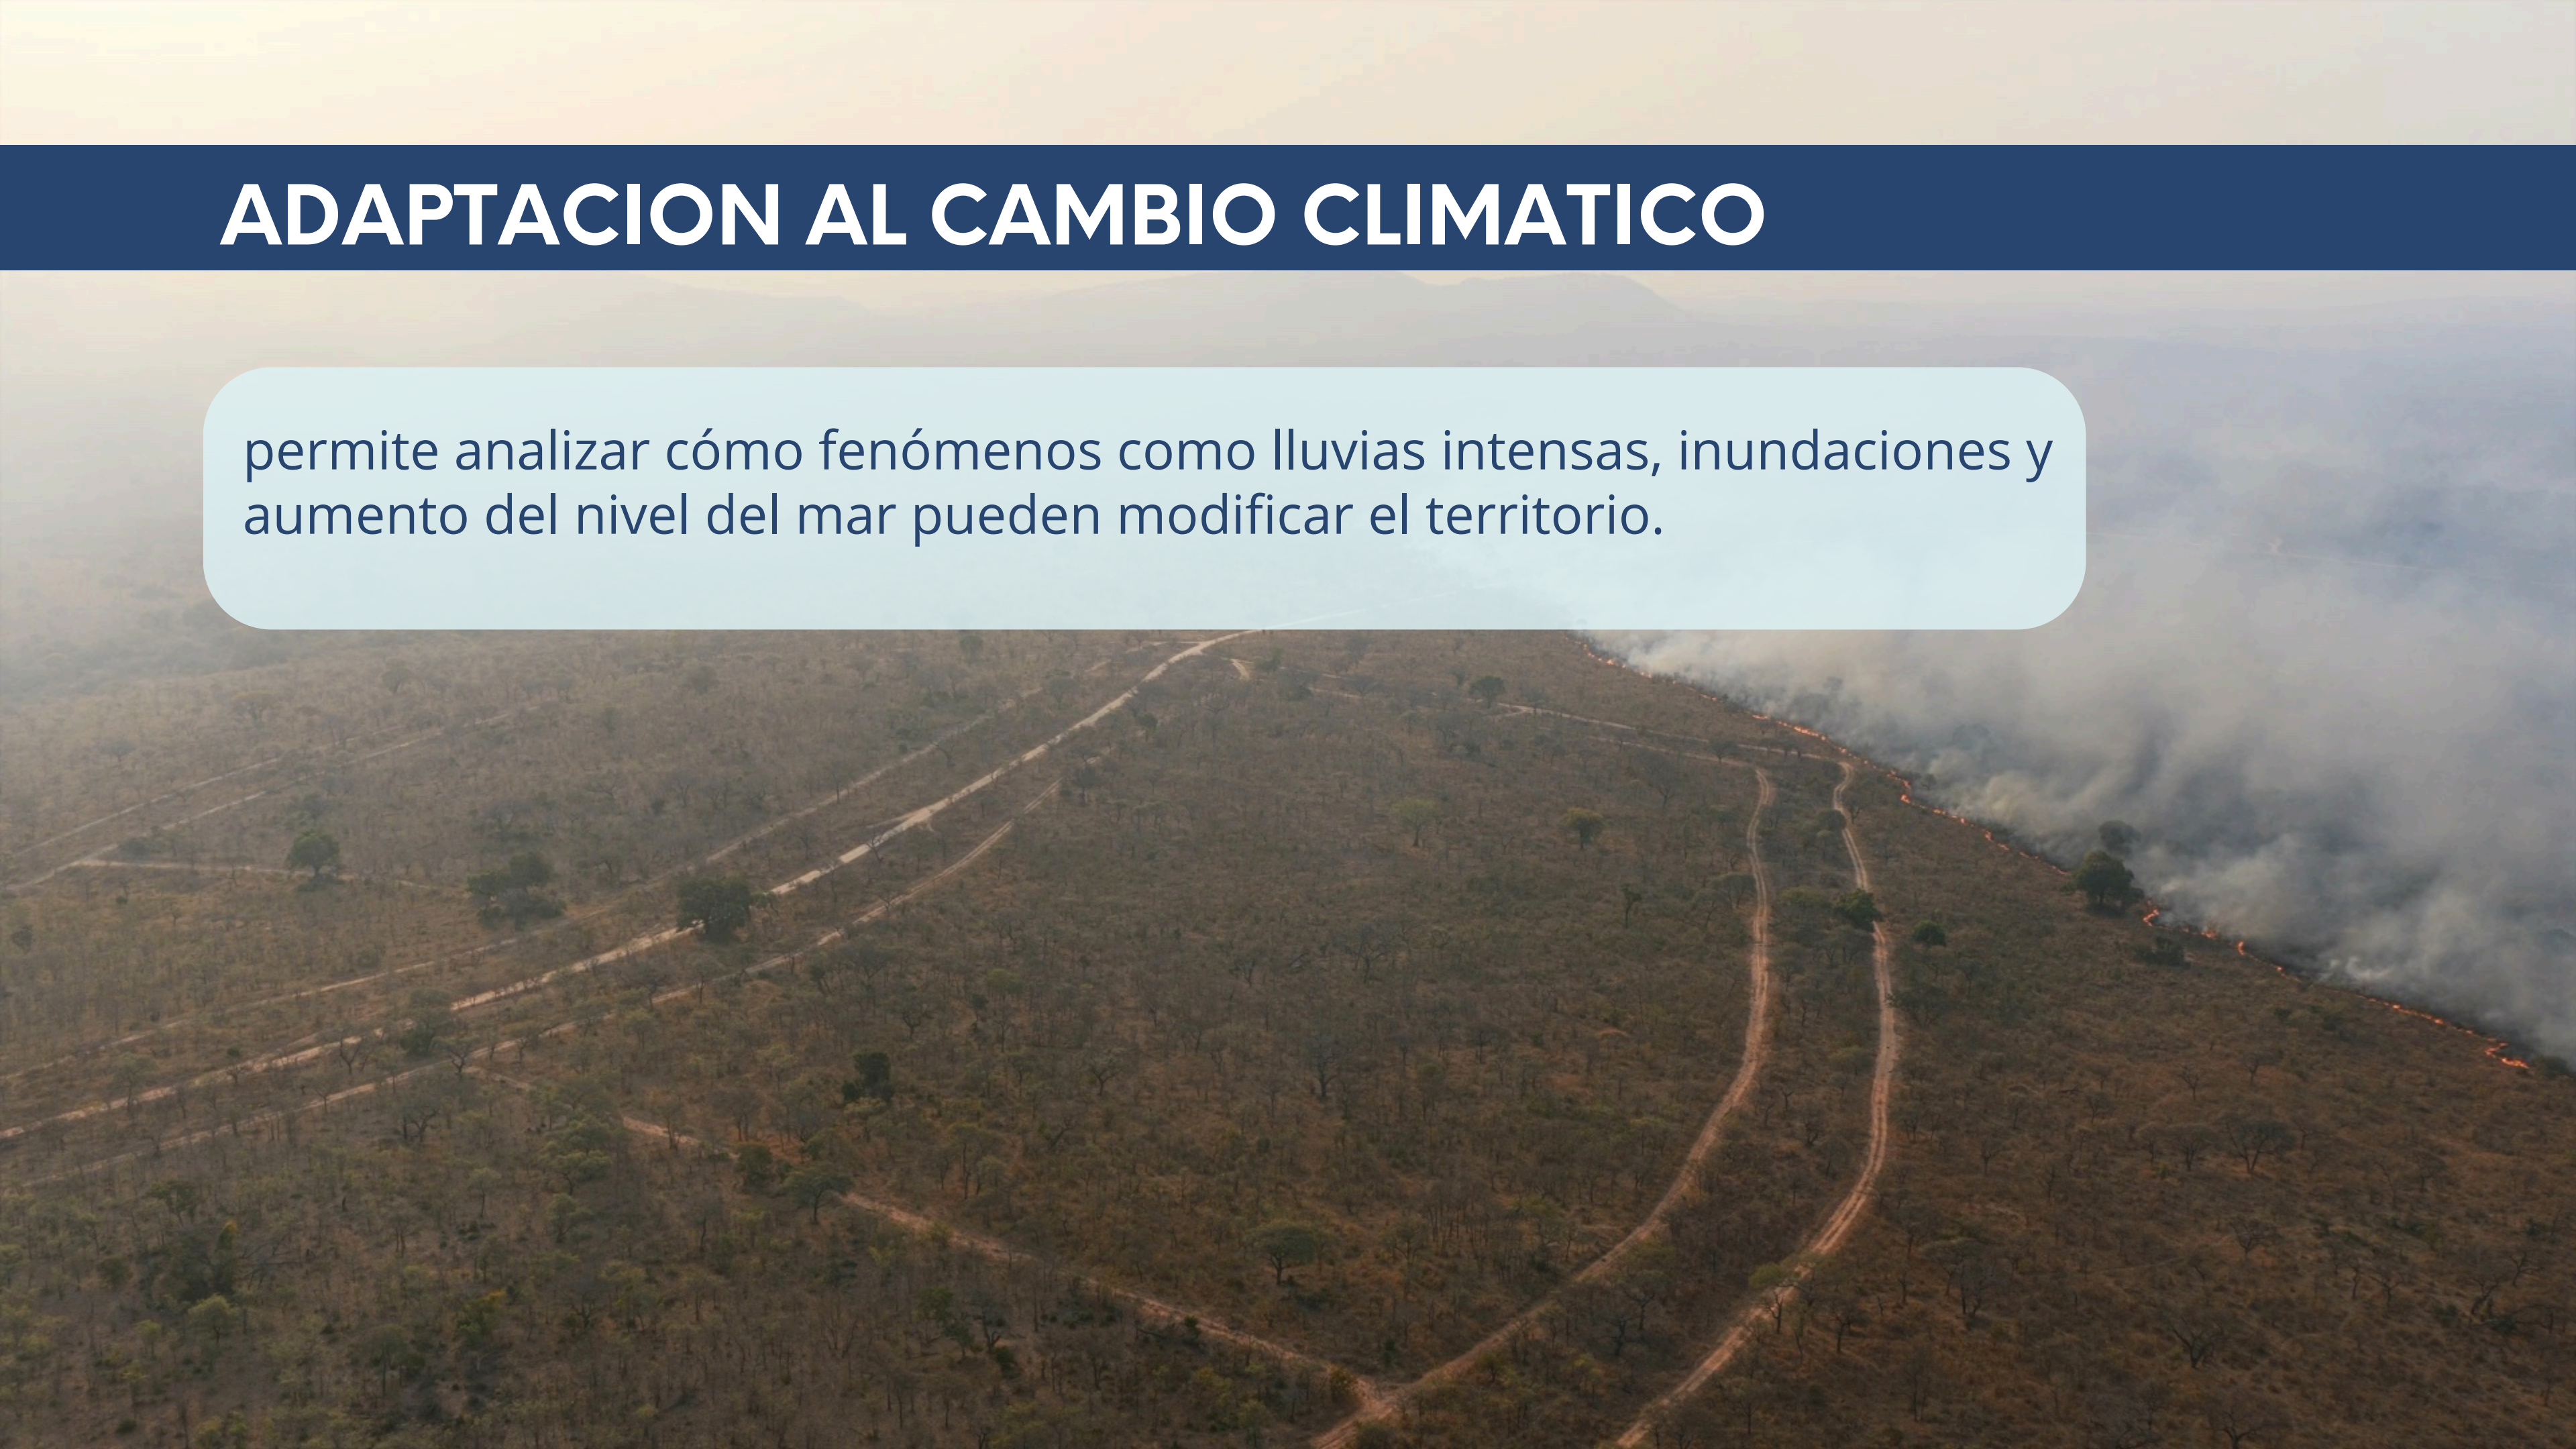

FUTURO DE LA GEOMORFOLOGÍA EN RD

En el futuro de la geomorfología en República Dominicana estará muy relacionado con la gestión de riesgos, la planificación del territorio, la conservación ambiental y el estudio de los cambios del relieve.

ADAPTACION AL CAMBIO CLIMATICO

permite analizar cómo fenómenos como lluvias intensas, inundaciones y aumento del nivel del mar pueden modificar el territorio.

MEJOR PLANIFICACIÓN TERRITORIAL

Ayuda a determinar qué áreas son adecuadas para construir viviendas, carreteras, puentes y otras infraestructuras.
